Protecting people from the harmful influences of poor hygiene standards
Expert Recommendations from Experienced People

Rentokil Specialist Hygiene is the UK’s largest national specialist cleaning company, delivering professional hygiene solutions nationwide for over 50 years. We are part of Rentokil Initial, one of the largest providers of business services across the world.

Our aim is to protect people from the harmful influence of poor hygiene standards, by presenting an extensive choice of high quality services tailored to ensure our customers can provide a high level of hygiene and any hazardous situations can be eliminated without risk to human health.

We offer a wide range of specialist cleaning services, from the deep cleaning of commercial kitchens, washrooms and hospitals, to industrial, high-level cleaning and drains maintenance.

As an experienced specialist cleaning company, we understand our clients’ emergency and hazardous cleaning needs and tailor our specialist cleaning services to suit each individual situation.

Being the best at what we do

We invest heavily in training, ensuring we have an highly experienced and knowledgeable team, capable of delivering the right solution for you. Our technicians undergo extensive training, externally accredited by the Royal Society for Public Health, both in the field and the classroom. They also receive regular field support from our dedicated Technical Team, in addition to periodic Quality Assessments. Our expert consultants graduate from a bespoke six-month programme of sales, technical and product training, with regular specialist courses throughout the year.

We understand the value of continuity and whether it is a technician or a consultant, we work hard to ensure that our people stay with us for many years.

In addition to training our front line colleagues our experienced Technical Team is constantly looking at new innovations to improve the service we deliver, allowing us to make the most appropriate recommendations to help you maintain or improve hygiene standards on your premises.

As a result, we deliver a consistent and effective service that ensures your peace of mind, allowing you to get on with running your business without the concern of poor hygiene affecting your reputation.
Expertise in Specialist Hygiene in the Commercial Kitchen and Washroom

**Commercial Kitchen Deep Cleaning**
Commercial catering environments such as kitchens, canteens and food preparation areas must adhere to stringent legislation governing their condition and hygiene standards. Daily cleaning routines can help to maintain good levels of hygiene, however on less accessible areas such as walls, ceilings, lights, equipment and kitchen fittings the accumulation of grease and fat can provide a potential breeding ground for bacteria. Additional regular deep cleaning ensures a high standard of hygiene, and compliance with the necessary legislation.

Rentokil Specialist Hygiene provides a wide range of kitchen cleaning services and equipment to premises throughout the UK.

- Kitchen Deep Cleaning
- Ventilation Cleaning (Steiger process)
- Bio-Dosing
- Grease Trap Cleaning
- Kitchen High Level Cleaning

**Washroom Deep Cleaning**
Daily cleaning and the effective removal of surface dirt and grime is an essential part of providing and maintaining a clean and hygienic washroom environment. However the clearing of uric salt and other potential blockages from pipework, as well as removing the build up of bacteria harbouring scale in other inaccessible areas, is an important factor in ensuring free-flowing conditions.

Our washroom deep clean service is no ordinary cleaning service. It is complementary to your daily or weekly cleaning service and in addition to the clearing of potential blockages, includes the cleaning of plug chains, grouting and all washroom and toilet surfaces which may not be covered by a standard washroom service.

- Washroom Deep Cleaning
- Free Flow Service
- WC and Urinal Sanitiser Service
- Air Steriliser Unit
- PIR Water Manager
Rentokil Specialist Hygiene has a wealth of experience in a wide range of industrial and high-level cleaning situations. We provide practical, cost effective services tailored to your needs. Our technicians are fully trained to meet the demands of this specialist work and are equipped with the most advanced industrial cleaning equipment available.

- High Level Cleaning
- Silo Cleaning & Food Manufacturing Site Cleaning
- Graffiti Removal
- Chewing Gum Removal
- Builders Cleaning
- Chute Cleaning
- Fire Damage Clean Up and Restoration
- Odour Removal
- After-clean Fogging Service

Drains Maintenance

Our drains maintenance service concentrates on bringing your drains and pipes back to maximum efficiency. Our skilled technicians operate nationwide, carrying out essential de-scaling, deep cleaning and minor repairs to restore drains to a healthy condition. We also check for pests and report any major defects. We will then recommend a scheduled programme of preventative maintenance visits to extend the normal life of your drainage system and ensure they are free flowing at all times.

- Blockages
- High Pressure Water Jetting
- Minor Repairs
- CCTV
- Preventative Maintenance Programme
Specialist Disinfection Services

Our specialist disinfection service is unique, and designed to provide a professional solution for extreme situations. It involves tackling difficult or hazardous cleaning problems safely, legally and discreetly. As such, it is a vital support service for local government departments, the NHS, the emergency services – police, ambulance and fire authorities – as well as many commercial organisations.

Extreme situations such as containing the spread of contagious diseases, prisons, suicide, road accidents, fire and flood clean ups, all require a different kind of expertise and often demand emergency support. Our specialist technicians are available for rapid response, 24/7 365 days a year and are trained to handle these types of situations considerately and discreetly. Our extensive training programmes, together with our vast experience ensure that we provide the right solution to every kind of extreme or hazardous cleaning problem.

- After-clean Fogging Service
- Bird Dropping Clean Up
- Body Fluid and Faeces Clean Up
- Contagious Diseases Disinfection
- Crime Scene Clean Up
- Death and Suicide Clean Up
- Emergency Services Clean Up
- Flood Damage Clean Up
- Hospital Deep Cleans
- Needle, Syringe and Sharps Removal
- Prison / Cell Clean Up
- Sewage Damage Clean Up
- Squatters / Eviction House Clean Up
- Trauma Scene Clean Up
Enhance your Company Image

A visible commitment to improving the hygiene standards in your business shows your concern for the well-being of your employees and visitors. Research has shown that the condition of your washroom is reflected in how people view your company and they link their first impressions to the standards they expect to receive elsewhere in your organisation.

Improve Health, Safety & Hygiene

At Rentokil we understand the importance not only of keeping industrial settings in a hygienic condition, but the demands that these extreme environments make on ensuring that health and safety remains of utmost importance at all times. Our years of experience, and specialist training, ensure that we are able to make the most appropriate recommendations for your business. Our dedicated Technical Team is always available to advise our clients on how to remain healthy, safe and hygienic within specialist situations.

How we can help

Our washroom deep clean programmes allow you to select the most appropriate methods to ensure that your washrooms are clean and hygienic. Your well-maintained and free-flowing washrooms will help to assure your customers and employees of your commitment to raising hygiene standards throughout your facilities, protecting your image and reputation.

How we can help

Access to a wide range of specialist equipment, in addition to the highest standards of technician training ensures that our teams are able to offer you an appropriate, tailor-made solution to your high-level and industrial cleaning demands. We understand the importance of limiting production down-time, whilst continuing to meet the demands of specialist working environments.
Protect the Environment

Our products and services are designed to help you to reduce your impact on the environment. Like most companies we look to reduce our waste in every way we can, and ensure that any waste we remove from, or generate on your site, is disposed of in accordance with all relevant legislation. Our dedicated Technical Team is constantly looking for ways to lessen our use of chemicals in carrying out our services, and to ensure the minimal environmental impact possible.

How we can help

Our EcoBlasting service offers an environmentally benign solution to graffiti removal and fire damage restoration. The EcoBlaster uses compressed air to blast a non-aggressive abrasive, such as soda or recycled bottled glass, to remove substrate layers, such as graffiti.

Comply with Legislation

Our years of experience in the hygiene business means we understand the legislation and regulations which govern the workplace. Our consultants and technicians are trained in the requirements of the Food Safety Act, in addition to the needs of major insurers, and are able to offer advice on hygiene issues within your business. Our quality service offers complete peace of mind that you are conforming to the Food Safety Act, and the requirements of due diligence as well as being compliant to the demands of your insurance policy in reducing fire risks.

Save Money

We deliver the right products and services for your business, ensuring that they deliver value for money. Our recommendations are guided by your business’ needs and priorities. We can help save your business money by:

• Providing only the services that you really need.
• Offering services that control excessive usage while safeguarding hygiene standards.
• Highlight the hidden costs of poor hygiene, such as lack of repeat custom and damage to reputation, which can cost your business money.

How we can help

Our planned preventative maintenance drains service will help to extend the life of your drains, and ensure they remain in free-flowing conditions, meaning you don’t have to pay for expensive call-outs to remove blockages.

How we can help

Our bespoke Kitchen Deep Cleaning service, including the structure, equipment and ventilation of your premises can be tailored to the specific requirements of your kitchen, your operating hours, and your insurance requirements. We can provide our free of charge Catering Hygiene Manual, helping you remain compliant with strict kitchen legislation, even whilst we’re not on site, in addition to documentation and certification of the work we’ve carried out on your premises.
